DEPARTMENT 1
HORSES

Chairperson: Anthony H. Regula, Jr., PO Box 110, Brownfield, PA 15416 (724-438-7216)

2016 Horse Health Regulations

In State Equine Animals:

1. A Certificate of Veterinary Inspection (CVI) issued after May 1, 2016.

2. All animals must be free of infectious and contagious diseases and a statement of this should be written on the CVI.

3. All equine animals must be test negative for EIA by an official test within the 12 months prior to the opening date of the exhibition. Laboratory test results must accompany each animal to its final destination (a copy of the original lab report is acceptable). The CVI shall specify the date of sample collection, date of results, and results of the EIA test, along with the accession number and the name of the testing laboratory. Foals less than six months of age accompanied by a test negative dam are exempt from EIA testing requirements. If the foal is not accompanied by the dam, a copy of the dam's test results must accompany the foal to its final destination.

4. A current rabies vaccination administered by a licensed veterinarian is recommended for animals 3 months of age and older.

Out of State Equine Animals

1. A Certificate of Veterinary Inspection (CVI) issued within the 30 days prior to the date of importation is required.

2. Vesicular Stomatitis (VS): (applies to states that experienced a Vesicular Stomatitis outbreak in the last 12 months). An accredited veterinarian shall determine whether the animals are free from VS, and animals shall be accompanied by a CVI with the following statement signed by the accredited veterinarian: "All animals identified on this certificate of veterinary inspection have been examined and found to be free from VS. During the past 90 days, these animals were not located within 10 miles of a site where VS has been diagnosed."

3. All animals must be free of infectious and contagious diseases and a statement of this is required on the CVI.

4. All equine animals must be test negative for EIA by an official test within the 12 months prior to the date of importation. Laboratory test results must accompany each animal to its final destination (a copy of the original lab report is acceptable). The CVI shall specify the date of sample collection, date of results, and results of the EIA test, along with the accession number and the name of the testing laboratory. Foals less than six months of age accompanied by a test negative dam are exempt from EIA testing requirements. If the foal is not accompanied by the dam, a copy of the dam's test results must accompany the foal to its final destination.

5. If an equine animal has resided in a state in which Piroplasmosis has been identified within the past six months for a cumulative total of 30 days or more within the six months preceding the date of entry into the Commonwealth, that animal must be test-negative for Piroplasmosis on a competitive enzyme-linked immunosorbent assay (c-ELISA) test, or a

Department-approved equivalent test, with the test occurring within the 30 days preceding entry into Pennsylvania. The date of test and the test results shall be written on the Certificate of Veterinary Inspection.

6. A current rabies vaccination administered by a licensed veterinarian is required for animals three months of age and older. However, if a mare was currently vaccinated against rabies when she foaled, the foal is not required to be vaccinated until six months of age, with a second vaccination administered twofour weeks later. All vaccine label directions must be followed, and all rabies vaccinated equine animals must be accompanied by a rabies vaccination certificate or the vaccination information must be included on the CVI. The certificate must contain legible name and contact information of the veterinarian who administered the vaccine and the veterinarian's signature. A copy of the original rabies vaccination certificate is acceptable.
