2025 Horse Health Regulations

******All exhibitors, at the time of animal check-in, must provide the Fair Office with a copy of their animals' health records. The health records will be kept by the Fair Office and will not be returned.******

Pennsylvania Equine Animals

1. A Certificate of Veterinary Inspection (CVI) valid for 30 days after the date of the issue.
2. All animals must be free of evidence of infectious and contagious diseases. A statement of this is required on the CVI.
3. All equine animals be test negative for Equine Infectious Anemia (EIA) by an official test within the 12 months prior to the opening date of the exhibition. Laboratory test results should accompany each animal to its final destination (a copy of the original lab report is acceptable) and should include the date of sample collection. The CVI shall specify the date of sample collection and EIA test results. Foals less than six months of age accompanied by a test-negative dam are exempt from EIA testing requirements. If the foal is not accompanied by the dam, a copy of the dam's test results must accompany the foal to its final destination.
4. A current rabies vaccination administered by a licensed veterinarian for animals 3 months of age and older. The name of the product used, date of administration and Veterinarian administering the rabies vaccination should appear on the CVI or on a Rabies vaccination certificate and this information should correlate to a written description of the horse, and any and all forms of identification associated with the horse- such as lip, tattoos, brands, or microchips.
5. Permanent identification, including microchip, tattoo, or brand.

Out of State Equine Animals

1. A Certificate of Veterinary Inspection (CVI) issued within the 30 days prior to the date of importation. **Please Note:** Extended Equine Certificates of Veterinary Inspection and Interstate Equine Event Permits will not be accepted. Brand Certificates will not be accepted as Certificates of Veterinary Inspection.
2. Vesicular Stomatitis (VS) statement: This applies to horses entering Pennsylvania from states that experienced a VS outbreak in the last 12 months. If applicable, an accredited veterinarian shall determine whether the animals are free from VS, and animals shall be accompanied by a CVI with the following statement signed by the accredited veterinarian: "All animals identified on this CVI have been examined and found to be free from VS. During the past 90 days, these animals were not located within 10 miles of a site where VS has been diagnosed."
3. All animals must be free of evidence of infectious and contagious diseases and a statement of this is required on the CVI.
4. All equine animals must be test negative for Equine Infectious Anemia (EIA) by an official test within the 12 months prior to the date of importation. Laboratory test results must accompany each animal to its final destination (a copy of the original lab report is acceptable). The CVI shall specify the date of sample collection and EIA test results. Foals under six months of age accompanied by a dam with negative EIA official test results are exempt from EIA testing requirements. If the foal is not accompanied by the dam, a copy of the dam's test results must accompany the foal to its final destination.
5. If an equine animal has resided in Texas or New Mexico for a cumulative total of 30 days or more within the six months preceding the date of entry into the Commonwealth, that animal must be test-negative for Babesia caballi and Theileria equi on a competitive enzyme-linked immunosorbent assay (c-ELISA) test, or a Department-approved equivalent test, with the test occurring within the 30 days preceding entry into Pennsylvania. The date of test and the test results shall be written on the CVI.
6. A current rabies vaccination administered by a licensed veterinarian for animals 3 months of age and older. The name of the product used, date of administration and Veterinarian administering the rabies vaccination should appear on the CVI or on a Rabies vaccination certificate and this information should correlate to a written description of the horse, and any and all forms of identification associated with the horse- such as lip, tattoos, brands, or microchips.
7. Permanent identification, including microchip, tattoo, or brand.
